

BORDER STOP

Technical Specifications

Material:	PCV
Warranty:	12 month

The BORDER danger zone fencing system is used at a minimum distance of 2 m from fall risk areas. It acts as a warning for people who are at a height near the place of absolute risk of falling from a height.

Its application includes among others performing works on flat roofs when laying insulation or conducting repair works. The system consists of inertial masses made of plastic to which the post with an extended warning chain is attached.
