

TRAX LIGHT B

safety post

The TRAX Light B safety post is intended for use as an anchoring point to prevent falling from a height for three people at the same time.

Mounted on reinforced concrete with a minimum class of C20/ B25. There is a fastening point on the end of the post with a swivel allowing 360° rotation in all directions. This prevents the formation of loops when the safety line is fastened.

The TRAX Light B anchoring point is made of stainless steel (material 1.4301) and is powder coated in yellow. The diameter of the anchor or mounting screw is 12 mm or 16 mm.

The TRAX Light B anchor point meets the requirements of the standard for anchor devices EN795, class A and CEN / TS 16415.

Specification

| | |
|----------|------------------------|
| Material | INOX |
| Weight | 0,2 kg |
