

TRAX LIGHT ST

safety post

The TRAX Light ST safety post is intended for use as an anchoring point protecting from falling from a height for three people at the same time.

Mounted to steel structures, I-sections, channel sections with a minimum wall thickness of 5 mm. There is a fastening point on the end of the post with a swivel allowing 360° rotation in all directions. This prevents the formation of loops when the safety line is fastened.

The TRAX Light ST anchor point is made of stainless steel (material 1.4301) and is powder coated in yellow. The diameter of the anchor or mounting screw is 12 mm or 16 mm.

The TRAX Light ST anchor point meets the requirements of the standard for anchor devices EN795, class A and CEN / TS 16415.

Specification

Material	INOX
Weight	0,2 kg
Size	100 mm
Diameter	16 mm
Users	3
Standard	EN 795 A, CEN/TS 16415
Warranty	12 months

Mounting substrates

Steel structures of I-sections,
channel sections
(min. wall thickness 5 mm)
