

TRAX LIGHT XL

safety post

The TRAX Light XL anchoring point is intended for use as an anchor point to prevent falling from a height for three people at the same time.

Available in mounting options for reinforced concrete (min. C20/25), and steel (min. depth =5 mm). Thanks to the large dimensions of the attachment point (100x166mm) and the appropriate bending profile, the connection with the connecting and damping element is more convenient.

Installed over machines or devices enables a quick belay set up with a telescopic rod.

Trax Light XL is made of stainless steel (material 1.4301) and is powder coated in yellow. The diameter of the anchor or mounting screw is 16 mm.

The TRAX Light XL anchor point meets the requirements of the EN795 type A and CEN/TS 16415 standard for anchor devices.

Specification

Material	INOX
Weight	0,3 kg
Size	100 mm
Diameter	16 mm
Users	3
Standard	EN 795 A, CEN/TS 16415
Warranty	12 months

Mounting substrates

Reinforced concrete	min. C20/25
Steel structures	min. depth 5 mm
