

TELESCOPIC POLE

Telescopic pole for pulling the cable of a self-braking device placed outside the reach of the user's hand, e.g. in the ceiling.

The pole is made of aluminium. The total length of the pole when unfolded is up to 4 m. After folding the pole is 2,2 m long. At the end, a metal hook is mounted to make it easier to remove the cable of the self-locking device.

Technical Specifications

Material:	PCV, aluminium, steel
Warranty:	5 years
